RWE and Bigambul People sign Cultural Heritage Management Plan for proposed Cattle Creek Wind Farm

- **Cultural Heritage Management Plan has been jointly developed**
- **Shared Benefits Agreement co-developed with the Bigambul People**
- **Proposed 1.1 GW project includes up to 135 wind turbines and a Battery Energy Storage System**

Melbourne, 6 July 2026

RWE and Bigambul Native Title Aboriginal Corporation RNTBC (BNTAC) have signed a Cultural Heritage Management Plan (CHMP) and Shared Benefits Agreement (SBA) to ensure the Bigambul People benefit from the construction and operation of the proposed Cattle Creek Wind Farm.

Proposed for near Dunmore, in southern Queensland’s Western Downs and Toowoomba Regional Councils, the 1.1 GW project would include a wind farm with up to 135 wind turbines and a Battery Energy Storage System.

The CHMP has been prepared in consultation with BNTAC and is a robust framework to ensure that cultural heritage values at the proposed site are managed in collaboration with the Bigambul People.

In addition to the CHMP, RWE and BNTAC have co-designed a Shared Benefits Agreement (SBA) to ensure a variety of benefits, including job opportunities for Bigambul People and the use of Bigambul businesses through the project’s lifespan.

Dan Belton, CEO RWE Renewables Australia:

“This CHMP and SBA are important milestones for our proposed Cattle Creek Wind Farm and important steps in ensuring positive outcomes for the Bigambul People.

“We have worked together to co-design a Shared Benefits Agreement that will ensure lasting and broad-reaching benefits for the Bigambul People of the lands on which our project is proposed, and we are proud to make this commitment.”

Elvie Sandow, Chairperson of the Bigambul Native Title Aboriginal Corporation RNTBC:

“This significant outcome places Bigambul Nation, the Traditional Owners, as partners with RWE in the renewable energy transition. These agreements exemplify contemporary best practice that will deliver

enduring benefits for the Bigambul People and RWE.

“This partnership marks a positive step in addressing social disadvantage and achieving economic independence for Our People. We acknowledge RWE’s commitment to meaningful partnership with us as Traditional Owners and we congratulate them on this key milestone. We’re very proud of this for the Bigambul People and the broader community.”

RWE Renewables Australia

Australia is one of RWE’s focus markets, where it has been present since 2013. In 2021, the company commissioned the Limondale Solar Farm in Balranald, New South Wales. The large-scale 314 MWac solar farm is made up of 872,000 panels and generates enough electricity to power about 105,000 homes per year. Next to the solar farm, RWE has started full operation of its Limodale battery storage, which is Australia’s first eight-hour BESS. RWE’s Australian team is developing a portfolio of onshore wind, solar, and battery storage projects across the country, supported by the global RWE team.

RWE

RWE is leading the way to a modern energy world. With its investment and growth strategy, RWE is contributing significantly to the success of the energy transition and the decarbonisation of the energy system. Around 20,000 employees work for the company in over 20 countries worldwide. RWE is one of the leading companies in the field of renewable energy. RWE is investing billions of euros in expanding its generation portfolio, in particular in offshore and onshore wind, solar energy and batteries. It is perfectly complemented by its global energy trading business. Thanks to its integrated portfolio of renewables, battery storage and flexible generation, as well as its broad project pipeline of possible new builds, RWE is well positioned to address the growing global demand for electricity, particularly driven by further electrification and artificial intelligence. RWE is decarbonising its business in line with the 1.5-degree reduction pathway and will phase out coal by 2030. RWE will be net zero by 2040. Fully in line with the company’s purpose - Our energy for a sustainable life.

Forward-looking statements

This press release contains forward-looking statements. These statements reflect the current views, expectations and assumptions of management, and are based on information currently available to management. Forward-looking statements do not guarantee the occurrence of future results and developments and are subject to known and unknown risks and uncertainties. Actual future results and developments may deviate materially from the expectations and assumptions expressed in this document due to various factors. These factors primarily include changes in the general economic and competitive environment. Furthermore, developments on financial markets and changes in currency exchange rates as well as changes in national and international laws, in particular in respect of fiscal regulation, and other factors influence the company’s future results and developments. Neither the company nor any of its affiliates undertakes to update the statements contained in this press release.
