KEY TERMS

Key Term	Description
The Applicant	Theodore Energy Development Pty Ltd
The Project	Theodore Wind Farm involves the development, construction and operation of a large-scale wind farm approximately 22 kilometres (km) east of the township of Theodore and 50 km south of Biloela in the Banana Shire Council Local Government Area, Queensland.
Project Area	The Project Area is the land/properties containing the Project. It is approximately 46,830 ha in size. The Project Area consists of nine lots on three properties. The total development footprint has a maximum area of 1,,589 ha, which accounts for approximately 4.1% of the Project Area.
Type 1 Rehabilitation	Natural regeneration measures that include no active planting of canopy cover trees for disturbance from linear assets and return some ecological functionality back to disturbance areas no longer required for operations. Restricted to low shrubbery and grass (937ha of the Disturbance Footprint).
Type 2 Rehabilitation	Rehabilitation/revegetation measures that aim to return nominal temporary pre-disturbance areas to full ecological functionality. Reinstated to equivalent pre-construction vegetation without height restrictions (93 ha of the Disturbance Footprint).
Construction Facilities and Laydown Compounds (temporary use areas)	This includes the 'temporary use areas' as defined under the Guide to State Development Assessment Provisions – State Code 16: Natural vegetation clearing (State Code 16 Guide).

TABLE 3-1 ENVIRONMENTAL VALUES

Environmental Values	Proposed Clearing / Impact
Regional Ecosystems associated with a watercourse or drainage features	The following impacts to regulate vegetation intersecting a watercourse are anticipated within the development footprint • 30.3 ha within stream orders 1 & 2 10 m buffer; • 4.7 ha within stream orders 3 & 4 with a 25 m buffer; and • 0 ha within stream orders 5 and above within a 50 m buffer.
Conserving an endangered, Of Concern and / or Least Concern Regional Ecosystem	The Project includes a maximum development footprint of 1,589 ha which includes the clearing of up to 613.1 ha of Category B Regulated Vegetation containing 610.6 ha of 'Least Concern' Regional Ecosystems, 1.0 ha of 'Of Concern' Regional Ecosystems and 1.5 ha of 'Endangered' Regional Ecosystems.

3.2 OPERATION AND MAINTENANCE FACILITIES

To monitor and maintain the wind farm facility during the operation and maintenance phase, two operations and maintenance facilities (OMF) will be established within the Project Area. The OMF will include management offices, workshops, storage, equipment laydown, and warehousing facilities.

Operational activities and their potential impacts during the operations phase include:

- Routine maintenance and servicing of turbines, access tracks, electrical installations and infrastructure as required, resulting in potential impacts of fauna vehicle mortality and incidents, habitat loss (though on a considerably smaller scale than construction phase activities), disturbance and potential hazardous materials exposure.

Operational phase activities, though longer in duration than those of construction phase

lower frequency and smaller in intensity (such as clearing and vegetation maintenance,

**PLANS AND DOCUMENTS
referred to in the
DEVELOPMENT APPROVAL**

Date: 20 June 2025

Amended in red by SARA on

20 June 2025

3.3 DECOMMISSIONING AND END-OF-LIFE REHABILITATION

Following the completion of the construction phase of the Project, construction laydown areas and widened access tracks not required for operation will be rehabilitated in accordance with good practice at the time and where not required for ongoing grazing or agricultural practices.

At the end of life, the WTGs towers and other above ground infrastructure will be removed, and the area rehabilitated in accordance with the regulatory framework applicable at the time and in consultation with the relevant landowner. Post-construction rehabilitation will be undertaken progressively as construction occurs. Decommissioning rehabilitation will be in accordance with an End of Operation Decommissioning Management Plan prepared towards the end of the Project's operational life.

4. POST CONSTRUCTION REHABILITATION

Following the completion of the construction phase of the Project, construction laydown areas and widened access tracks not required for operation are anticipated to be revegetated. Rehabilitation has been separated into two types:

- **Type 1 Rehabilitation**– Natural regeneration measures that include no active planting of canopy cover trees for disturbance from linear assets and return some ecological functionality back to disturbance areas no longer required for operations. Restricted to low shrubbery and grass (937ha of the Disturbance Footprint).; and
- **Type 2 Rehabilitation** - Rehabilitation/revegetation measures that aim to return nominal temporary pre-disturbance areas to full ecological functionality. Reinstated to equivalent pre-construction vegetation without height restrictions (93 ha of the Disturbance Footprint).

The extent of Type 1 and 2 Rehabilitation will be as per the required bushfire setback and minimum offset requirement for electrical cabling. An example cross-section of Type 1 and 2 Rehabilitation is included as Appendix A.

Where appropriate, areas of disturbance associated with construction are to be rehabilitated in accordance with a post-construction rehabilitation plan. This plan identifies areas of disturbance that are not required to be used during the operation of the Project. Rehabilitation objectives will be developed and have consideration for the existing condition, potential ongoing direct and indirect impacts, the need to maintain setbacks to reduce bushfire risk, and the need for disturbance for decommissioning. It is expected that rehabilitation will be required following end-of-life decommissioning of the Project.

4.1 PROPOSED REHABILITATION AREAS

The Project will require temporary disturbance to regulated vegetation to facilitate construction activities. Following the completion of construction, areas identified as not being required for operation and maintenance have the potential to be rehabilitated, in accordance with a Post-Construction Rehabilitation Plan to be developed for the Project.

It is of note that after the construction phase there is an opportunity to rehabilitate the following areas:

- 937 ha of Type 1 regeneration/rehabilitation; and
- 93 ha of Type 2 revegetation/rehabilitation.

Given the Project footprint of 1,589 ha, taking into account the area potentially rehabilitated after construction, the operation footprint is anticipated to be 559 ha. This includes 93 ha of 'temporary use areas' as defined under the Guide to State Development Assessment Provisions – State Code 16: Natural vegetation clearing (State Code 16 Guide) (Department of Resources, 2023) which will not be required post-construction. These areas have been nominated for Type 2 Rehabilitation. In addition to this, there is 937 ha of disturbance associated with construction, which does not contain operational infrastructure but is required to remain clear for the purpose of ongoing maintenance and decommissioning activities. These are nominated for Type 1 Rehabilitation. The permanent operation footprint required for the Project is 559 ha, required to facilitate construction.

Figure 4-1, depicts the Project Area showing the Project footprint and the proposed area of rehabilitation after the construction phase.

An indicative cross-section of Type 1 and 2 rehabilitation is included as Appendix A.

4.2 REHABILITATION ACTIVITIES

Depending on the location of disturbance and potential continued use through the life of the Project, the rehabilitation activities are anticipated to include:

- Mulching of cleared vegetation for use in rehabilitated areas;
- Potential reuse of cleared trees over rehabilitation areas to provide habitat;
- Topsoil stockpiling for use in rehabilitated areas;
- Natural regeneration of groundcover;
- Hydro-seeding of battered slopes to promote growth and bank stability;
- Direct seeding of native plant and grass species; and
- Planting of native species tube-stock where appropriate and no future disturbance is required.

4.3 REHABILITATION OBJECTIVES

Rehabilitation efforts for flora and fauna will focus on maintaining ecosystem functionality, through minimising the disturbance and rehabilitating in accordance with pre-clearance vegetation, bushfire setbacks and minimum offset requirements for electrical cabling.

Key objectives for this Preliminary Post-Construction Rehabilitation Plan include:

- Minimise the risk of damage to installed infrastructure;
- Ensure that the rehabilitation of vegetation post-construction is properly planned in a manner which promotes self-sustaining ecosystems;
- Ensure rehabilitation of native vegetation able to develop into a viable ecological system, comparable to pre-clearing native vegetation and its land uses;
- Ensure rehabilitation continues until ecosystems and all impacted areas are self-sustaining;
- Restore pre-clearance levels of biodiversity and ecosystem functionality;
- Re-planting to be consistent with pre-disturbance REs where development is planned within these REs, especially for ecosystems and vegetation communities known to provide habitat for known threatened species koala, greater glider and squatter pigeon in the medium-long term;
- Ensure connectivity for native wildlife through species-specific management practices, including:
 - Groundcover revegetation focused on establishing a diverse grassy understorey suitable for foraging, to provide for small native mammals;
 - Maintain connectivity for koala and greater glider habitat;
 - Larger logs that are cleared from the development site would be placed within the revegetation area to provide additional micro-habitat features; and
 - Ensuring a fauna spotter-catcher is on-site to relocate fauna within designated areas to be cleared.
- Reusing topsoil and utilising mulch made from cleared vegetation;
- Preventing erosion of soil, particularly on sloped terrain; and
- Ensuring exotic plant species do not take hold and dominate regrowth vegetation.

4.4 REHABILITATION MANAGEMENT

Rehabilitation aims to implement environmental management practices and procedures, that look to:

- Restore and improve areas disturbed during the construction phase;
- Reinstate connectivity of fauna habitats, thus improving ecological processes;
- Minimise soil erosion and sedimentation;
- Prevent/minimise the outbreak of exotic species within the area of rehabilitation;
- Ensure that topsoil is managed effectively; and
- Monitor, inspect, and maintain the revegetated areas.

It is important to note that the principles and methods detailed in Table 4-1, despite their focus on post-construction rehabilitation, should be implemented at the earliest possible opportunity. The rehabilitation principles outlined in Table 4-1 apply broadly to all infrastructure.

TABLE 4-1 REHABILITATION PRINCIPLES, METHODS AND PERFORMANCE OUTCOMES

Rehabilitation Methods	Performance Outcome	Responsibility	Monitoring	Infrastructure associated
Temporary use areas as defined under the State Code 16 Guide – Rehabilitation in accordance with pre-clearance vegetation (Type 2 Rehabilitation)				
- The use of tube-stock containing native species (in 50x70mm pots) that reflects the surrounding environment will assist in speeding up the rehabilitation process in areas outside of the corridor. - Matting also helps to conserve soil moisture, improves water infiltration and soil structure, and moderates soil temperatures, thereby improving plant growth. - Plastic tree guards, held away from a seedling by 3 stakes, to protect against grazing by feral pests, and provide protection from dying winds. - Revegetation will range from grassing areas with species that were common within the Project Area before construction, planting trees, and/ or allowing for natural regrowth. - Approximately 70% understory cover to be successfully established with a successful establishment of native species representative of the existing RE or neighbouring vegetation. This serves to protect and cover soils and vegetation, to minimise the risk of erosion and provide homogeneity with the surrounding vegetation. - Provide areas of newly rehabilitated areas with pre-clearance values and ecological secondary succession through planting and regenerating native species in line with pre-existing Regional Ecosystem values. - Replacement of native trees along the second order streams within the Project Boundary to increase the vegetation density along the creek-lines and enhance its value as a linking corridor with remnant vegetation fragments. - Strong focus and ongoing management of rehabilitation of koala fodder eucalypt species.	70% height and 50% cover rehabilitation are achieved in accordance with the <i>Vegetation Management Act 1999</i> (VM Act) for defining remnant vegetation with a successful establishment of native species representative of the existing RE or vegetation; - Rehabilitated vegetation will reflect pre-existing Regional Ecosystem; and - Post-construction and post-rehabilitation, there will be no loss of ecosystem function.	The Proponent	- Completion of rehabilitation task sheets; - Visual and monitoring assessment; and - Chronological photographic documentation.	Construction Facilities and Laydown Compounds (temporary use areas)

**PLANS AND DOCUMENTS
referred to in the
DEVELOPMENT APPROVAL**

SARA ref: 2409-41961 SDA

Date: 20 June 2025

Rehabilitation Methods	Performance Outcome	Responsibility	Monitoring	Infrastructure associated
Progressive Restoration of Construction Footprint (areas to be utilised during maintaining and decommissioning) (Type 1 Rehabilitation)				
In areas identified for progressive restoration, it might be appropriate to regenerate the cleared area with grass species, with weed management processes in place. This weed management may involve the use of mulch formed from vegetation cleared from the Project Area.	Land stability and grass cover with a successful establishment of 70% neighbouring grass species.	The Proponent	Visual and monitoring assessment for a 12-24 month period.	- Access corridors - Turbine hardstand areas - Transmission and Reticulation Corridor
Topsoil Management				
- Topsoil to be replaced before seeding takes place. - Topsoil to be stockpiled where appropriate (not in areas of high weed seed) and used in the rehabilitation process. - Topsoil from similar vegetation communities to be respread at similar depths (~5cm) to those originally removed.	Appropriate topsoil stockpiled and re-used where appropriate.	Construction contractor	- Completion of topsoil records; and - Soil testing.	- Access Corridors - Turbine Hardstands - Watercourse Crossings - Transmission and Reticulation Corridor - Construction Facilities and Laydown Compounds (temporary use areas)

**PLANS AND DOCUMENTS
referred to in the
DEVELOPMENT APPROVAL**

SARA ref: 2409-41961 SDA

Date: 20 June 2025

Rehabilitation Methods	Performance Outcome	Responsibility	Monitoring	Infrastructure associated
Fauna management				
- A spotter catcher will inspect all koala, squatter pigeon and grey falcon habitat where it intersects with infrastructure prior to clearing. - Use of a fauna spotter catcher during the construction phase to relocate native species in areas from be cleared. - Where possible, minimise disturbance to fauna habitat within the Project Area. - Vegetation and Fauna Management Plans are to be adhered to throughout the post-construction phase.	No fauna mortality during clearing and construction. Potential and essential habitat regions are rehabilitated.	The Proponent and Construction contractor	Areas of potential koala, squatter pigeon and grey falcon habitats frequently monitored and regrowth documented.	- Access Corridors - Turbine Hardstands - Watercourse Crossings - Transmission and Reticulation Corridor - Construction Facilities and Laydown Compounds (temporary use areas) - Construction & Laydown Compounds (areas that are required post-construction)

PLANS AND DOCUMENTS
referred to in the
DEVELOPMENT APPROVAL

SARA ref: 2409-41961 SDA

Date: 20 June 2025

Table 4-2 provides a more detailed and focused rehabilitation methodology for rehabilitation around areas cleared for each infrastructure type. Indicative disturbance cross-sections of these areas are provided in Appendix A.

TABLE 4-2 REHABILITATION METHODS FOR INFRASTRUCTURE

Infrastructure	Rehabilitation Methods
Access Corridor	- Determine progressive restoration opportunities post-construction based on rehabilitation opportunity areas identified in Appendix A. - Roads and access tracks to be constructed with a suitable gravel road base and will remain unsealed. In sections where the access tracks will be remediated, gravel will be removed from the access tracks and treated. - Every possible attempt made to avoid vegetation in habitat crossings. Where this is unavoidable, cleared wooden vegetation will be placed within, or near to the cleared area, where possible, to encourage fauna habitat continuation.
Turbine Hardstands	- After construction, disturbed areas not covered by infrastructure are to undergo progressive restoration - Ensure the Bushfire Protection Zone is maintained - Monitor for weeds post-construction and treat them accordingly - Consider potential future uses for maintenance and observation activities.
Watercourse Crossings	- After construction, disturbed areas of the bed and banks of the waterway outside the permanent development footprint are returned to their original profile and stabilised to promote the regeneration of natural fish habitats. - Rehabilitation criteria for watercourse crossings is to be consistent with the Stormwater Management Plan and Erosion and Sediment Control Plan developed prior to the commencement of construction. - Fertiliser and sedimentation management are required when working close to watercourses. - Installed crossings and culverts would likely be retained after rehabilitation of the Project Area, at the discretion of host landowners.
Transmission and Reticulation Corridor	- Where there are ditches for underground cabling, these will be backfilled and the area above the cables rehabilitated with low growing species which will not constitute a risk to the installed infrastructure - Respread topsoil and cleared vegetation across installed infrastructure. - Monitor for weeds post-construction and treat them accordingly - This will be rehabilitated through a combination of methods described in this table and Table 4-1.
Construction Facilities and Laydown Compounds (temporary use areas)	- Avoid sealing temporary construction laydown areas - Monitor for weeds post-construction and treat them accordingly - Cleared compounds not required for O&M are decommissioned and rehabilitated in accordance with Table 4-1 including Type 1 Rehabilitation (natural regeneration) of the compounds outside regulated vegetation areas, and Type 2 Rehabilitation for those areas defined under State Code 16 as "temporary use areas".

4.5 MONITORING AND REPORTING

Monitoring of proposed rehabilitation areas will occur annually for the first three years after the completion of construction, then every five years until the performance objectives are met.

Prior to the clearing of vegetation, a monitoring plan will be developed by the Applicant for the Project.

The monitoring will be undertaken by a suitably qualified person, depending on the methodology to be applied as part of the monitoring.

As part of the monitoring, the following may be considered:

- Plant growth, percent of cover and survival rates;
- Plant losses through herbivores, disease, vandalism, storm damage, etc;
- Weed regrowth and control measures; and
- Plant replacement

The intent of the monitoring report is to inform ongoing management actions and to provide adaptive management recommendations to ensure the performance objectives are achieved.

The monitoring reports will be kept for 3 years and are able to be provided to the regulators upon request.

APPENDIX A PROJECT LOCATION

APPENDIX B PROJECT FOOTPRINT

APPENDIX C FLOOD EXTENT & WATERWAYS

APPENDIX D RUSLE EROSION RISK

APPENDIX E RUSLE DISTURBANCE FOOTPRINT ASSESSMENT

2.5 PROPOSED MITIGATION AND CONTROL MEASURES

2.5.1 GENERAL

This assessment has been carried out ahead of the detailed design of roads and access tracks. Based on the disturbance footprint provided, access roads have typically been placed in areas to try and avoid very high and extremely high erosion risk (though this is not always possible). It is noted however, that access tracks will likely be required to traverse hill slopes in some areas of the disturbance footprint.

A site-specific erosion and sediment control plan (ESCP) will be required for each area disturbed. This should be referred to in the CEMP for the project. The development of the site-specific ESCP is to be in accordance with the State Planning Policy (SPP) (2017); Appendix 2 SPP. The design objectives are provided for construction and post-construction phases, covering the following issues:

- Drainage control;
- Erosion control;
- Sediment control;

The principal contractor will be responsible for the preparation and implementation of the ESCP, meeting the required minimum water quality objectives potentially represented by the Environmental Protection Policy (EPP) 2019 guidelines.

During the operational phase, sediment and erosion management and control measures will be governed by an operational Environment Management Plan. The CEMP should include details of the required control measures, engineering drawings (which will be available at the detailed design phase), and ongoing maintenance measures and schedules.

The information in the following sections is provided to identify potential controls and procedures that could be adopted to mitigate erosion and sedimentation impacts. It is recommended these controls be incorporate into the CEMP and ESCP, with identification of who is responsible for the controls and procedures adopted to mitigate surface water impacts.

For erosion and sediment controls to be effective, the following fundamentals are required (IECA, 2008):

- Ensure ESC measures are designed and constructed effectively.
- Minimise the duration and extent of soil exposure.
- Promptly stabilise disturbed areas.
- Maximise sediment retention on the Project.
- Control water movement through the Project.
- Minimise soil erosion wherever possible rather than applying down slope sediment controls.
- Utilise existing topography and adopt construction practices that minimise soil erosion and sediment discharge from disturbed areas.
- Maintain ESC measures in proper working order at all times.
- Monitor the project and adjust ESC practices to maintain required performance standards.

Some erosion control measures that should be considered during the detailed planning phase include:

- Compost Blanket - Used during the revegetation of steep slopes either incorporating grasses or other plants. It is also particularly useful when the slope is too steep for the placement of topsoil, or when sufficient topsoil is absent from the slope.
- Graveling - Used for protection of non-vegetated soils from raindrop impact erosion and also used to stabilise areas such as car parks and access roads.
- Revegetation - Used to provide stabilisation of soil, it can also be used to stabilise long-term stockpiles.
- Rock Mulching - Used for long term stabilization of non-vegetated banks and minor drainage channels.

Some flow velocity control structures that should be considered during the detailed planning phase include:

- Rock Check Dams - Used in drains with a depth exceeding 0.5 m and a gradient less than 10%, as well as minor sediment traps.
- Recessed Rock Check Dam - Used in wide, high velocity, shallow channels where sandbag check dams would likely wash away, recessed into the soil to maintain hydraulic capacity in the channel, and minor sediment traps.
- Sandbag Check Dam - Used in shallow drains with a depth less than 50 mm and gradient less than 10%, and minor sediment traps. These check dams are small and less likely to divert water out of the drain.
- Fibre Roll (Biodegradable logs) - Used in wide shallow drains where logs can be anchored down, they can also be used in locations where it is desirable to integrate into the vegetation, such as vegetated channels, and for minor sediment traps.
- Triangular Ditch Check - Used in drains with less than 10% gradient, minor sediment traps, and commonly used to stabilise newly formed table drains.

In addition to the general controls outlined above, Training is to be provided to relevant Project personnel, including relevant sub-contractors, on sound erosion and sediment control practices.

2.5.2 PRE-CONSTRUCTION PHASE

- The contractor is to establish a stabilised entry/exit point (rumble pad) for each area of the project with all-weather access to a sealed road. The stabilised entry and exit points will include a vehicle cleaning area (i.e. a shakedown device or wash facility) to mitigate the transportation of dust and dirt.
- Sediment fences are to be placed along the low side of the disturbance footprint where required to slow flows, reduce scour, and capture some sediment runoff. Soil testing should be undertaken (if required) to confirm the type of sediment fence most suitable for the disturbance footprint. This work should form part of the CEMP preparation and implementation by the contractor.
- Table drains or diversions (if required) should be located along the high side of each infrastructure area and the corresponding access track. This is to capture and minimise the flow of water across the disturbed areas.
- Areas for plant and construction material storage are to be designated along with associated diversion drains and spillage holding ponds.

- Construction compounds and temporary facilities are recommended to be located within areas of low erosion risk.
- Site personnel are to be educated to the sediment and erosion control measures implemented for the Project.

2.5.3 CONSTRUCTION PHASE

- The CEMP should include progressive stabilisation of exposed areas by the construction contractor to reduce erosion and sediment run-off.
- Construction activities are to be staged and confined to the necessary construction areas.
- Transport of any loads that are subject to loss through wind or spillage shall be covered or sealed to prevent entry of pollutants to stormwater system.
- Regular inspection and maintenance of sediment fences, sediment basins and other erosion control measures by the contractor. Following rainfall events sufficient to produce runoff, inspection of erosion control measures and removal of collected material should be undertaken. Replacement of any damaged equipment should be performed immediately.
- Adequate inspection and maintenance of controls in high erosion risk areas (Appendix D) by the contractor to ensure that the controls in these areas are operating effectively to manage the elevated risk of erosion that is present.

2.5.4 POST CONSTRUCTION PHASE

- The maintenance of erosion and sediment control devices should occur until stabilisation (revegetation) of disturbed areas has occurred to the satisfaction of the superintendent and principal contractor.
- All table drains (if implemented) are to be revegetated post construction.

2.5.5 PROTECTION ON SLOPES

This section highlights some practical measures to be included in the CEMP to manage erosion in extremely high risk areas associated with steep slopes in particular.

Noting that detailed roadway design is yet to be completed, which is likely to minimise ongoing extremely high erosion risk, the measures to be employed to manage erosion are focused on the construction phase. The measures proposed have been adopted from the IECA BPESC book. These are detailed below:

- Avoid disturbance (where practicable) during erosive periods of the year. Rainfall data for the region indicates a wet season from December to March, with a dry period from June to September.
- Where possible, construction should be phased to limit exposure to disturbance areas as far as practical.
- Use of mulch bunds on sloped areas to divert flows.
- Channels to be rock lined.
- In areas where the slope exceeds 1 in 10, implement hydraulically applied blankets such as bonded fiber matrix (BFM) or compost blankets to promote the establishment of a vegetative cover. BFM can also assist in reducing the effect of raindrop impact erosion.

It will be important to monitor the controls implemented to determine whether they are achieving the appropriate outcomes. Depending on the final disturbance footprint for the Project, sediment basins may be required if significant disturbance of high risk areas are planned. If necessary the following should be considered:

- Type B or D sediment basin (if disturbance is for less than 12 months).
- Type A sediment basin (if disturbance is in place for 12 months or more).

2.5.6 WATERWAY CROSSINGS

In general, most waterway crossings will have some influence on the conditions surrounding the crossing site. However, suitably designed and constructed waterway crossings consider the long-term stream dynamics at the crossing site to minimise potential impacts. The failure to do so, potentially risks long term physical damage to the surrounding waterway and potential damage to, and/or failure of the crossing structure. The potential impacts associated with waterway crossings are site-specific but, in general, may include:

- Increased sediment and nutrient loads due to altered roadside drainage arrangements.
- The disturbance and / or removal of riparian and in-stream vegetation.
- Prevention of fish passage/aquatic fauna through the crossing structure.
- The alteration of the stream's natural flow pattern, both in-channel and floodplain flows, including:
 - The reduction in hydraulic capacity through the structure, (possible low flow damming effect and reduction in aquatic health).
 - The raising of water levels (an increased afflux or backwater effect) upstream of the crossing structure, potentially increasing the flooding upstream.
 - Increased hydraulic forces and hence erosion potential surrounding the crossing structure through the concentration of flows and poor design arrangements (concentration of flow).
 - A rise in water level on the upstream side of a crossing caused when the effective flow area at the crossing is less than the natural width of the stream (afflux).

Some waterway crossing types to be considered during the detailed planning phase include:

- Bridge;
- Box Culvert;
- Pipe Culvert (circular); and
- Bed Level Crossing / Causeway (i.e. a low-profile ford or bed level crossing that does not incorporate a culvert).

PLANS AND DOCUMENTS
referred to in the
DEVELOPMENT APPROVAL

SARA ref: 2409-41961 SDA
Date: 20 June 2025

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

SARA ref: 2409-41961 SDA

Date: 20 June 2025

Notes: Derived Reference Points are provided to assist in the location of area boundaries.

Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).

Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

PLANS AND DOCUMENTS referred to in the DEVELOPMENT APPROVAL

SARA ref: 2409-41961 SDA
.....
Date: 20 June 2025
.....

Attachment: 2409-41961 SDA Derived Reference Points Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

SARA ref: 2409-41961 SDA
Date: 20 June 2025

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

PLANS AND DOCUMENTS referred to in the DEVELOPMENT APPROVAL

SARA ref: 2409-41961 SDA
Date: 20 June 2025

Attachment: 2409-41961 SDA Derived Reference Points Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

SARA ref: 2409-41961 SDA

Date: 20 June 2025

Attachment: 2409-41961 SDA Derived Reference Points Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

SARA ref: 2409-41961 SDA

Date: 20 June 2025

Notes: Derived Reference Points are provided to assist in the location of area boundaries.

Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).

Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

SARA ref: 2409-41961 SDA
Date: 20 June 2025

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

SARA ref: 2409-41961 SDA

Date: 20 June 2025

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

SARA ref: 2409-41961 SDA
.....
Date: 20 June 2025
.....

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

SARA ref: 2409-41961 SDA

Date: 20 June 2025

Notes: Derived Reference Points are provided to assist in the location of area boundaries.

Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).

Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

SARA ref: 2409-41961 SDA

Date: 20 June 2025

Notes: Derived Reference Points are provided to assist in the location of area boundaries.

Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).

Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

SARA ref: 2409-41961 SDA

Date: 20 June 2025

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

	Part ID	Unique ID	Easting	Northing		Part ID	Unique ID	Easting	Northing		Part ID	Unique ID	Easting	Northing		Part ID	Unique ID	Easting	Northing

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

SARA ref: 2409-41961 SDA
Date: 20 June 2025

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

SARA ref: 2409-41961 SDA

Date: 20 June 2025

Notes: Derived Reference Points are provided to assist in the location of area boundaries.

Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).

Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

SARA ref: 2409-41961 SDA

Date: 20 June 2025

Notes: Derived Reference Points are provided to assist in the location of area boundaries.

Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).

Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.

Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).

Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

SARA ref: 2409-41961 SDA

Date: 20 June 2025

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

.....

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

SARA ref: 2409-41961 SDA
Date: 20 June 2025

Attachment: 2409-41961 SDA Derived Reference Points Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

SARA ref: 2409-41961 SDA
Date: 20 June 2025

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

SARA ref: 2409-41961 SDA
.....
Date: 20 June 2025
.....

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

SARA ref: 2409-41961 SDA
Date: 20 June 2025

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

PLANS AND DOCUMENTS
referred to in the
DEVELOPMENT APPROVAL

SARA ref: 2409-41961 SDA
Date: 20 June 2025

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

SARA ref: 2409-41961 SDA

Date: 20 June 2025

Notes: Derived Reference Points are provided to assist in the location of area boundaries.

Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).

Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

SARA ref: 2409-41961 SDA

Date: 20 June 2025

Notes: Derived Reference Points are provided to assist in the location of area boundaries.

Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).

Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

PLANS AND DOCUMENTS
referred to in the
DEVELOPMENT APPROVAL

SARA ref: 2409-41961 SDA
Date: 20 June 2025

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

SARA ref: 2409-41961 SDA

Date: 20 June 2025

Notes: Derived Reference Points are provided to assist in the location of area boundaries.

Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).

Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

SARA ref: 2409-41961 SDA
Date: 20 June 2025

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

SARA ref: 2409-41961 SDA
Date: 20 June 2025

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

PLANS AND DOCUMENTS
referred to in the
DEVELOPMENT APPROVAL

SARA ref: 2409-41961 SDA
Date: 20 June 2025

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Date: 20 June 2025

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

SARA ref: 2409-41961 SDA

Date: 20 June 2025

Notes: Derived Reference Points are provided to assist in the location of area boundaries.

Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).

Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

.....

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

SARA ref: 2409-41961 SDA

Date: 20 June 2025

Notes: Derived Reference Points are provided to assist in the location of area boundaries.

Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).

Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

SARA ref: 2409-41961 SDA

Date: 20 June 2025

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Attachment: 2409-41961 SDA
Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

SARA ref: 2409-41961 SDA
Date: 20 June 2025

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.

Derived Reference Points
Datum: GDA2020, Projection: MGA Zone 56

Notes: Derived Reference Points are provided to assist in the location of area boundaries.
Responsibility for locating these boundaries lies solely with the landholder and delegated contractor(s).
Coordinates start at a point indicated on the accompanying plan and continue sequentially when labels are not shown.
